

### **Training course on strategy and technology of sustainable mining in Hoa Binh province in 2017.**

On 02/2/2017, the Department of Natural Resources and Environment (DoNRE), in collaboration with the Leibniz Institute of Ecological Urban and Regional Development (Federal Republic of Germany), organized the training workshop on "Strategy and technology of sustainable mining in Hoa Binh Province". Attending the conference were Prof. Dr. Mueller – chair of the MAREX project and experts from Germany. On behalf of the Department, comrade Nguyen Tran Anh (Deputy Secretary of the Party Committee, Vice Director of DoNRE); representatives of other departments, localities and some enterprises producing and trading minerals in the province.

The training conference on the Strategy and technology of sustainable mining in Hoa Binh Province in 2017 on investing in modern mining technologies, investing in solutions and works for environmental protection has been investigated by experts in order to find solutions thereto. At the meeting Prof. Dr. Müller – chair of the MAREX project presented an overview of the project MAREX, its purpose, content and meaning when deployed in Hoa Binh province divided in 5 topics: The MAREX project and mining in Hoa Binh province; basic information about concepts and methods; MFA-oriented planning; strategies for management optimization through the physical flow model; strategies for efficient mining. The training workshop provided the trainees with the occasion to exchange, discuss, estimate the feasibility of the project MAREX when applied in Vietnam and specifically in Hoa Binh province. The training ended after 2 days of implementating the 5 topics. Dr. Georg Schiller who represented the MAREX project has received the opinions of participants and will continue to explore and find solutions to apply modern technology in exploiting minerals and building materials in the province for the future, to support environmental protection.
